

## PRESS INFORMATION

### **Olympus Enhances Flexibility of ENT Care in EMEA with Single-use Rhinolaryngoscope**

**Hamburg, October 24, 2025 – Olympus Corporation (Olympus), a global MedTech company, introduces the Vathin E-SteriScope™ single-use flexible video rhinolaryngoscope for use in diagnostic and therapeutic otorhinolaryngological procedures. The disposable E-SteriScope maximizes flexibility and choice for ENT (ear, nose, and throat) physicians. Manufactured by Hunan Vathin Medical Instrument Co., Ltd., and distributed by Olympus, it is now available in select regions of the EMEA (Europe, Middle East and Africa) market.**

As a leader in endoscopy, Olympus is committed to offering a comprehensive portfolio that includes a full range of access, visualization, and therapeutic ENT endoscopy solutions. With the addition of the E-SteriScope single-use flexible video rhinolaryngoscope, healthcare providers have flexibility in their approach to every procedure.

“We are very excited to launch this single-use rhinolaryngoscope as a complement to the full Olympus ENT portfolio in EMEA,” said Martijn Koster, Global ENT Business Unit Leader at Olympus. “It supports physicians in balancing the many factors that influence clinical workflow and deciding on the best pathway to diagnosis and treatment.”

#### **Portability, connectivity, and convenience**

Featuring advanced portability, the E-SteriScope gives healthcare professionals the freedom to see patients in the operating room or the office, with the option to perform biopsies, injections, and other procedures in more sites of care.<sup>1</sup>

Streamlined content management and data sharing platforms, including the Olympus nCare™ recorder and VaultStream™ server, support collaboration among physicians and nurses, allowing them to connect seamlessly with team members while patient data is stored safely and can be accessed easily from one location. And with a working channel option and workflow pathway solutions, the single-use rhinolaryngoscope contributes to improved procedural efficiency, reduced procedure-related costs, and increased patient satisfaction.<sup>2</sup>
